

PRESS RELEASE | COMMUNITY & PARTNERSHIPS

Partnership That Touches Lives

AMUCTA Public Relations Office • Tabora, Tanzania • August 2026

The Archbishop Mihayo University College of Tabora (AMUCTA), in collaboration with Living Water Children's Fund, paid a courtesy and monitoring visit to Kizigo Primary School in Tabora, reaffirming a partnership that continues to change young lives across the region.

The visit was organised to express appreciation for the school's continued partnership and to witness first-hand the impact of fifteen (15) desks previously donated to Kizigo Primary School. The donation has gone a long way in addressing the long-standing shortage of classroom furniture and in creating a safer, more comfortable learning environment for pupils. During the visit, representatives of both organisations reaffirmed their joint commitment to exploring further avenues of support for the school.

From left: pupils of Kizigo Primary School seated at the newly donated desks; and AMUCTA and Living Water Children's Fund representatives engaging with pupils and staff during the outreach visit.

A particularly touching moment of the visit was a success story involving a child living with disabilities who benefited from the 2025 MOBO Clinic. The clinic supported the identification and assessment of children with disabilities across Tabora Municipal, connecting them with the specialised care and support services they need to thrive.

A child living with disabilities receives care and support facilitated through the 2025 MOBO Clinic initiative in Tabora Municipal.

For AMUCTA, initiatives of this nature reflect the University College's ongoing commitment to Corporate Social Responsibility. By partnering with organisations such as Living Water Children's Fund, AMUCTA continues to transform lives, strengthen communities and promote inclusive opportunities for every child in Tabora Region and beyond.
